2013

Carlo Bughi

Born on 1972 May 11th

Ordine degli Architetti (corresponding to UK RIBA) n° 3178, since 2002

contact: carlo.bughi@unife.it | skype: [carlo.bughi](https://www.skype.com/people/carlo.bughi) | mobile: +44 07 473 949 960

I hold an **MSc in Architecture** from the University of Firenze (2001) and I've started my professional activity as Architect in Bologna (Italy). In 2007, I have been invited to join the University of Ferrara as **lecturer at the Department of Architecture**: ever since, I am in charge of the course of **Representation Techniques** where I train students in BIM and Graphic design, print and colour management.

Since I joined the University, I have developed and managed a number of projects as **Art Director** both within the DIAPReM Centre (Development of Integrated Automatic Procedures for Restoration of Monuments), and at TekneHub, one of the Labs of the Technology hub of the Emilia-Romagna High Technology Network, a leading regional programme for knowledge transfer and innovation.

At Consorzio Ferrara Ricerche, I've managed and coordinated several projects as **Executive creative director** for Nemetschek Italia, EPSON Italia, Consorzio Stile 21, L'Invisibile by Portarredo, focusing on the technology transfer between University/Professionals/Industry.

In 2010 I've joined Maggioli Editore as **Editor** and **Executive** for **books, magazines** and **multimedia** projects, and in 2012 I have been appointed as BIM and Representation Technique's leading and responsible editor for Paesaggio Urbano | Urban Design, an international journal on Architecture.

In 2012 I've become **Communication and Creative Director** at MAK Building and Stora Enso, leading companies in the wooden construction market, with the goal to promote their activity in Italy and to develop their **Corporate Identity**.

In 2013 ASTER, the Consortium for Innovation and Technology Transfer in Emilia-Romagna, has invited me to join a professional working group to set the strategies and the roadmap for the cultural and creative industry for the Emilia Romagna Region.

My wide and diverse experience lead me to the conviction that goals can only be successfully achieved if the team and the relationship among participants are sound, and I still questions the **team management** impact. My questions has found an answer when I met the LEGO SERIOUS PLAY method and I've been committed to working on B4bricks project.

To summarise my experiences, I've realised this "interactive" portfolio, with my **skills**, an overview of my activity (**INDEX**), and detailed case studies focused on **Communication, e-magazine & multimedia, Corporate identity, Book, Contents & Catalogues, Events & Multimedia**.

In these pages, the pictures above the timeline are linked to "postcards" with a detailed description of my role, activities, soft skill and tools employed. Each company logo is linked to the organisation's profile with names of references. To better substantiate and illustrate the projects hereby presented and the results achieved, pictures may be linked to external web pages and videos.

Biografilm Festival it is the only international event entirely committed to promote and support biographies and life tales. The Festival brings the best selection of biopics, documentaries and short films produced every year on an international basis. Biografilm Festival has progressively dedicated a wide visibility not only to screenings, but also meetings, debates, presentations of books, theater shows, exhibitions, concerts and moments of exchange between the audience and the leading characters of the contemporary cultural scene.
Ref.: Mrs Emanuela Ceddia, Marketing Director

B4Bricks.org is a group of professionals and researchers who use LEGO * SERIOUS PLAY * method and propose and its application in different fields and branch of knowledge. Team leader are Patrizia Bertini and Carlo Bughi. LEGO * SERIOUS PLAY* is a methodology based on constructivist theories that employs LEGO bricks. LSP is widely used in organisational context for team building, strategy and vision definition and to develop both individual and team's identities. Many Companies and Organisations, like Fujitsu, MasterCard, Hilton Hotels, MIT Media Lab, World Bank Group, Yahoo, Microsoft, employed LEGO * SERIOUS PLAY * method in the world.
Ref.: Ms Patrizia Bertini, B4Bricks co-founder

Founded in 1993, the **Consorzio Ferrara Ricerche** (CFR – Ferrara Research Consortium) is a non-profit organisation with public and private participation, aimed at the promotion, development and exploitation of human, scientific, technological and economic resources mainly of the territory of Ferrara. The mission of CFR is to promote and to manage research, innovation and technology transfer, by offering itself as a decisive and preferential partner for universities, research centres, public institutions and industrial companies in Italy and abroad, besides acting as a link between the generators of know-how, industrial organisations and the working world.
Ref.: Mrs. Stefania Corsi, Director

EPSON's history spans more than 100 years, with a heritage that began in watch making and led to the invention of the world's first quartz watch along with many other technology "firsts." This long tradition of creating products that are smaller and more precise continues today, with the development of some of the world's most advanced micromechanronics capabilities for ultra fine, high precision processing.
Ref.: M Silvia Macchi, Marketing Manager EPSON Italia

The story of the **Maggioli Group** began a century ago and has now crossed four generations alongside the evolving Public Administration and the free-line Professional linked to it. Taking knowledge, innovation and top level know-how into the Public Administration helping it to handle future challenges and respond to citizens' needs better (even latent ones) by simplifying procedures and facilitating daily work; that is the Maggioli Group strategy pursued through 5 Business Units: Publishing and Conventions, Information Technology, Document Management, Managing Revenue and Service, Training and Consultancy.
Ref.: Mr. Gabriele Semprini, Chief Editor

Nemetschek is a leading global software provider for the architecture, engineering and construction (AEC) market. Headquartered in Munich, Germany, with its 11 brands it serves more than 300,000 customers in 142 countries from 40 locations worldwide. The Group has always focused on innovations such as Open Building Information Modeling (Open BIM) for the AEC market of tomorrow. The company, listed in the TecDAX of the German Stock Exchange, generated revenues of EUR 175 million in 2012 and a result before interest, tax and depreciation (EBITDA) of EUR 41 million.
Ref.: Mr. Flavio Andreatta, CEO Nemetschek Italia

Stile 21 is a Consortium grouping several companies operating in the wood construction sector. The consortium companies are the followings: Legnotech SpA, Ciabatti Legnami Srl, Marlegno Srl, Mori Legnami Srl, Rao & Sartelli Srl, Zoppelletto Srl.
Ref.: Arch. Valerio Rao, President of STILE 21 Consotium

Stora Enso. Leader in wood derived products, it has over 30.000 employee in 35 countries, it is active world-wide and it had a 2011 revenue of 11,3 billion Euros. CLT production sites are in Austria, in Bad St. Leonhard and Ybbs an der Donau. **MAK Group** joined the partnership in 2008 and it is the sole Stora Enso's CLT panel distributor in northern Italy, which takes in 75% of all national wood constructions. MAK Group produces 65.000 m3 wooden floors and timber profiles, its Italian annual turnover is over 30 million Euros. All waste materials are used to produce more than 25.000 tons of pellet.
Ref. : Mr. Massimo Marino (CEO MAK Group)

TekneHub is one of the four Laboratories of the Tecnopole of Ferrara, within the European Platform Construction of the High Technology Network of the Emilia Romagna region, the first regional plan in Italy focused on fostering Innovation, Industrial Research and Tecnology Transfer. TekneHub refers to the University of Ferrara with the main aim of supporting SMEs to develop new products, methods and services or to adapt their own ones, to the specific needs of the cultural heritage.
Ref. : Prof. Marcello Balzani, Director

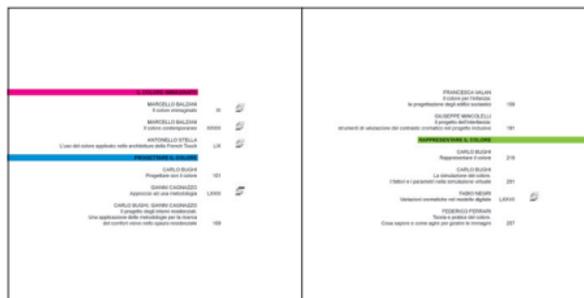

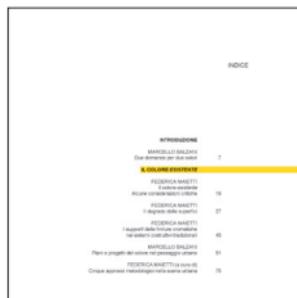

The **University of Ferrara**, one of Italy's oldest universities, has welcomed and educated illustrious personalities from the worlds of culture, the Arts and Science, such as Nicolò Copernico and Paracelso. The University of Ferrara was founded in 1391 by the Marquise Alberto V of Este with the permission of Pope Bonifacio IX. **Department of Architecture**. Architecture and Architectural Engineering provides a solid cultural and scientific education, combined with a creative outlook and sufficient professional training regarding the complex design culture.

**MAGGIOLI
EDITORE**

Title: Marcello Balzani, "Il progetto del colore. Vademecum operativo per la gestione cromatica delle superfici architettoniche", Maggioli Editore, Rimini, 2011

Il volume si configura come un vademecum teorico-operativo che affronta il tema del colore in architettura nelle sue principali declinazioni: dal colore delle superfici esterne ai colori della scena urbana, dalle metodologie di rilievo e analisi finalizzate alla definizione cromatica dell'architettura storica, contemporanea e degli spazi interni, agli strumenti per lo studio del colore nelle rappresentazioni digitali, dai prodotti tradizionali di finitura agli innovativi involucrori esterni. Il tema del colore viene affrontato nella sua valenza temporale/culturale (tra tradizione e innovazioni), dal punto di vista metodologico (dal rilievo al progetto) e pratico al fine di fornire uno strumento operativo utile a progettisti, tecnici e basati sulle applicazioni nell'affermata e difficile cornice della salvaguarda dell'identità cromatica dei luoghi da un lato e del progetto contemporaneo dall'altro. L'originalità di un volume come questo, che si presenta in una doppia veste (cartacea e digitale) offrendo complessivamente circa 400 pagine di contenuti, è ancora più forte oggi, in quanto le industrie stanno trasferendo molti contenuti di ricerca nella creazione di superfici, componenti, applicazioni impiantistiche, avendo spesso la difficoltà di riuscire a comunicare efficacemente lo sforzo e i potenziali di innovazione tecnologica.

Marcello Balzani, architetto, Professore Associato presso il Dipartimento di Architettura dell'Università di Ferrara, Direttore del Centro Dipartimentale CDAPIUM dell'Università di Ferrara e responsabile scientifico del Laboratorio FabLab del Tecnopolo di Ferrara affiliato alla Piattaforma Costruzioni della Rete ad Alta Tecnologia della Regione Emilia-Romagna. È autore di molte pubblicazioni che riguardano lo studio e l'analisi dei centri storici, il progetto assemblee, il rilievo architettonico ed urbano e lo sviluppo di tecniche integrate di rilievo avanzato con laser scanner 3D per l'analisi e la ricostruzione dei beni culturali. È Direttore delle riviste di architettura *Paisaggio Urbano* e *Architetti*, idee cultura e progetto.

Alberti's Box
Un progetto culturale multimediale per le architetture di Leon Battista Alberti

Alberti's Box è un modo per fare conoscere in Italia e nel resto del mondo gli edifici progettati da un grande intellettuale del Rinascimento: Leon Battista Alberti.

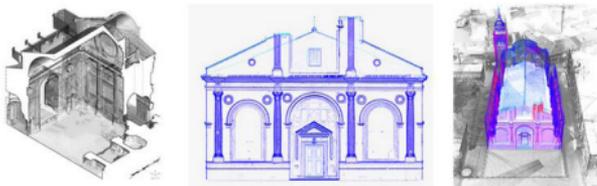

La lunga sinopia tra il Centro dipartimentale [DIAF&B&I](#), afferente al [Tecnolab](#) del [Tecnopolis di Ferrara](#) ([Università di Ferrara](#)) [Piattaforme Costruzioni Rete Alta Tecnologia](#) Regione Emilia-Romagna, e la Fondazione [Centro Studi Leon Battista Alberti](#) di Mantova, ha permesso di maturare, in collaborazione con il [Consorzio Ferrara Ricerche](#), un progetto culturale per mettere a disposizione di tutti la ricerca e la documentazione sulle architetture albertiane attraverso la ricostruzione di un flusso di immagini e riflessioni nel tentativo di mostrare come "progettava" Leon Battista Alberti e quali sono ancora i problemi che le sue architetture pongono.

L'idea è molto semplice e nasce sostanzialmente dal famoso motto "se Maometto non va alla montagna la montagna va a Maometto" con l'intento però di non sostituire in toto l'edificio reale, ma di sollecitare invece la sua visione diretta.

Si tratta di una operazione atipica non solo perché propone una lettura trasversale degli edifici albertiani, ma perché ha come oggetto beni immobili quali i manufatti architettonici che senza un'operazione digitale di smaterializzazione corporea e di successiva rimaterializzazione, difficilmente potrebbero essere visualizzati, percepiti, compresi.

Alberti's Box è un format digitale riproducibile in loco e pensato con margini di flessibilità e adattabilità ai diversi spazi che saranno di volta in volta dedicati all'allestimento.

Il progetto che viene presentato per la prima volta a livello internazionale al [Salone del Restauro](#) di Ferrara, non sarà il modello definitivo del "cubo albertiano", ma è una prima occasione per testare il progetto culturale e il relativo potenziale comunicativo.

Logo versions

Logo

The logo is a stylized house icon with a tree silhouette on the left side. The text 'MAK building' is written in a bold, sans-serif font below the icon.

Color & versions

The logo is available in various color combinations and sizes. The primary colors are green and black. The text 'MAK building' is written in a bold, sans-serif font.

Wrong uses

The logo should not be used in a way that is not consistent with the brand identity. Examples of wrong uses include using the logo on a red background, a yellow background, or a background with a forest scene.

Other uses

The logo can be used in various ways, such as on a business card, a letterhead, or a website. The logo should be used in a way that is consistent with the brand identity.
